

TRIADS

Each Triad light is precision machined from high strength aerospace aluminum. Bright dip industrial anodizing is accented by an extremely durable foamed vinyl grip. Two leak proof Lithium power cells provide one hour of continuous run time with a ten year shelf life. The self-contained Parabolic Reflector Assembly is metalized and gasket sealed. It produces a brilliant white penetrating beam of incredible brightness.

The patent pending Softouch Activation System is sensitive and quiet. It employs circuit board technology and a self-cleaning computer micro switch. Assemblies are modular, easily replaced and available in a variety of ergonomic configurations. Dual contacts provide both intermittent and constant on/off activation.

Softouch Triads
in Black (3000) and Electroless (3001) feature sensitive and quiet activation.

Logo Triads in Brass (33 ___) or Nickel Silver (31 ___) combine positive activation with a die struck Prestige insignia.

Tactical Triads in Black (3002) and Electroless (3003) join a high intensity light to any ASP Baton.

Shooting Switch Triads in Black (3004) and Electroless (3005) have separate and distinct intermittent and constant-on activation.
