

ASP FACTS

FEATURE: Overmolded Grips

ADVANTAGE:

ASP D/F Series grips are injection molded directly onto the handles of ASP Batons. DuraTec® (aluminum) and Federal® (steel) handles are completely encased. The unitized appearance and 70 Durometer textured Krayton provides a cushioned grip that is easily retained in the hand. The batons have the same feel as the finest custom knife and handgun grips.

SPECIFICATION:

- Clean, smooth appearance
- Improved grip durability
- Rubberized gun grip feel
- Soft, textured surface
- Internal positioning rings lock the grip onto the handle and prevent shifting
- Patent 5,645,276
- Patent 5,919,093

PERFORMANCE:

Overmolded Grips are permanently bonded to the handles of ASP Batons. They provide a firm grip that is extremely durable. The grips are attractive and easily maintained.

SALES STRATEGY:

Compare the clean, smooth appearance of overmolded ASP grips to the feel of competitive batons.
