

ASP FACTS

FEATURE: LeverLoc®

ADVANTAGE:

The four internal lugs of the LeverLoc Baton provide positive extension.

A simple twist allows the opposing stops to cam free of the eccentric internal retention grooves. The baton is compatible with all existing Tactical Baton® caps and scabbards.

SPECIFICATION:

- 4140 steel tubing
- 7075 T6 aluminum alloy tubing
- Foamed vinyl grip
- Injection molded elastomeric grip
- Two internal tube stops
- Two pairs of opposing stainless steel locking lugs
- Stainless retention post
- Two eccentric retention groove
- Twist to release

PERFORMANCE:

The LeverLoc is elegantly simple, yet incredibly strong. Four stainless steel lugs lock the baton open. Eccentric internal retention grooves allow these opposing lugs to cam free. The LeverLoc consists of only 16 parts. It is closed with a simple twist.

SALES STRATEGY:

Show the minimal number of parts in the LeverLoc. Demonstrate the ease of extension, solid lockout and simple twist retraction.
